SUPPORT SERVICE FACILITY

Developing Our Headquarters – Expanding Our Service Capability.

This service and support facility located close to our operation base houses our extensive store and provides areas dedicated for stores, maintenance, classroom and practical training.

This facility is designed to support our operation teams providing inspection repair, engineering test and quarantine areas. Sureclean's attention to safety and commitment to training is supported by the extensive training facilities and demonstration area which allows training for staff and customers personnel to be undertaken no matter the prevailing weather condition.

Our new service and support facility (near our headquarters) greatly increases our service provision and our on-site training capabilities – complete with offices, storage areas, workshops and training facilities. Our practical training and demonstration area includes a large diameter pipe descaling area, a heat exchanger cleaning area adjacent to the wash bay and a vessel entry trainer (VET).
